☐	📁 Script
☐	📄 EULA-Licence.txt
☐	📄 readme.txt

Upload **all the Files from the Folder "Script"** to your Webspace (root, Folder or Subdomain)

Create a **New Database and upload the sql file "DokkyDB_"**

Add the required Informations to the file **CONFIG/GLOBAL.PHP**

DONE! Now Dokky is ready to Amazed your Users!

Dokky Customizzations

Customize your Scipt in the fly

Add your ADS, to the file CONFIG/ADS.PHP

The available sizes are 728x90 px and 350x350 px

```
20
21  // ADD YOUR AD CODES as the examples
22
23  // 728x90 px
24  function ad_view() {
25      return <<<EOT
26
27  <a href="#" target="_blank"><img class="img-fluid" src="assets/img/728x90.png" width="728" height="90" alt="Dokky Banner" /></a>
28
29  EOT;
30  }
31
32  //350x350 px
34      return <<<EOT
35
36  <a href="#" target="_blank"><img class="img-fluid" src="assets/img/350x350.png" width="350" height="350" alt=" Dokky Banner" /></a>
37
38  EOT;
39  }
40
41  //350x350 px
42  function ad_signup() {
43      return <<<EOT
44
45  <a href="#" target="_blank"><img class="img-fluid" src="assets/img/350x350.png" width="350" height="350" alt="Dokky Banner" /></a>
46
47  EOT;
48  }
49  ?>
```

Change the Colors of your Website

You can change the main colors of Dokky, by uncommenting the related CSS color.
Open the file INCLUDE/HEADER.PHP

📄 header.php

```
76
77  <!-- Vendor CSS Files -->
78  <link href="assets/vendor/bootstrap/css/bootstrap.min.css" rel="stylesheet">
79  <link href="assets/vendor/bootstrap-icons/bootstrap-icons.css" rel="stylesheet">
80  <link href="assets/vendor/aos/aos.css" rel="stylesheet">
81  <link href="assets/vendor/glightbox/css/glightbox.min.css" rel="stylesheet">
82  <link href="assets/vendor/swiper/swiper-bundle.min.css" rel="stylesheet">
83  <link href="assets/vendor/viewer-js/viewer.min.css" rel="stylesheet">
84
85  <!-- Variables CSS Files. Uncomment your preferred color scheme and renamed it as "variables.css" -->
86  <link href="assets/css/variables.css" rel="stylesheet">
87  <!-- <link href="assets/css/variables-blue.css" rel="stylesheet"> -->
88  <!-- <link href="assets/css/variables-green.css" rel="stylesheet"> -->
89  <!-- <link href="assets/css/variables-orange.css" rel="stylesheet"> -->
90  <!-- <link href="assets/css/variables-purple.css" rel="stylesheet"> -->
91  <!-- <link href="assets/css/variables-red.css" rel="stylesheet"> -->
92
93  <!-- Template Main CSS File -->
```

Install Dokky to a Folder

After set the name of the folder, to the file global.php, go to the file .htaccess and include the **name of the folder** to the rules:

Eg. /**dokky**/ or the name of the folder where it is installed, and add it to all the "RevriteRule" urls available.
Eg: RewriteRule ^index$ index.php becomes RewriteRule ^index$ /**dokky**/index.php

Change Text to the HomePage

In the index.php File add your site description, in the space between:

<!-- Start Homepage Txt Introduction -->

Your Text Here...

<!-- End Homepage Txt Introduction -->

Do you need your Script with Custom Functions?

Dokky Script is sold "as is", in which it is possible to customize some parts of the software.
Do you want a unique and personalized configuration?
